*Among the ruined temples there,  
Stupendous columns, and wild images  
Of more than man, where marble demons watch  
The Zodiac's brazen mystery, and dead men  
Hang their mute thoughts on the mute walls around,  
He lingered, poring on memorials  
Of the world's youth; through the long burning day  
Gazed on those speechless shapes; nor when the moon  
Filled the mysterious halls with floating shades,  
Suspended by the task, but ever gazed  
And gazed, till meaning on his vacant mind  
Flashed like strong inspiration, and he saw  
The thrilling secrets of the birth of time.*

—Percy Bysshe Shelley, *Alastor*, 1816

## PREFACE

The Ptolemaic temples are some of the best-preserved examples of Egyptian religious architecture. In addition to their outstanding artistic value, they represent the culmination of a long line of temple development, particularly in the writing and reliefs used to decorate their walls. During the Ptolemaic period, the number and polyvalency of hieroglyphic signs and iconographic elements increased dramatically, thereby widening the scribal playing field for creating expressions that function on multiple aural, visual, and thematic levels.

There have been few scholarly studies of these plays on words, signs, and iconography; despite the intrinsic relationship of texts, reliefs, and architecture in Egyptian monuments, there have been no comprehensive studies of these techniques within a unified architectural space. I was therefore motivated to study these scribal methods within the most important cult chamber of the Temple of Hathor at Dendera: the Per-wer sanctuary. Building upon the work of Gutbub, Guglielmi, and Derchain, I extended their approaches to the material in several ways: examining these techniques on both micro- and macro-levels, from their smallest details to their broadest thematic connections; foregrounding individual techniques to determine the words and phrases singled out for emphasis; synthesizing their use in the interconnections formed between scenes and texts within the three-dimensional space of the cult chamber.

I found that these scribal techniques support the three main themes of the Per-wer: Hathor as Creator and solar goddess; the Myth of the Distant Goddess; the King as Intermediary between the human and divine worlds. The myth creates the context for the king's interaction with the goddess, allowing his ritual actions to restore cosmic balance and activate the creative process. By communicating across boundaries, the scenes link complementary pairs, creating a network of interrelationships that mirrors the perfection of the divine Creation.

The results of my study suggest that this three-pronged approach could profitably extend to those of other cult chambers at Dendera, and to other Greco-Roman temples, whose reliefs also contain plays on words, signs, and iconography. By studying these complex techniques of the ancient scribes, we can thereby come closer to understanding how they envisioned the universe and the place of humankind within it.

## ACKNOWLEDGMENTS

This book is an updated version of my doctoral dissertation, submitted in 2012 to the Near Eastern Studies Department of the University of California, Berkeley. My sincere appreciation goes to James P. Allen for generously inviting me to publish this study in the Wilbour Egyptology monograph series of Brown University and Lockwood Press.

I owe a debt of gratitude to my long-time teacher and mentor, Cathleen Keller, who first encouraged me to pursue graduate studies in Egyptology at the University of California at Berkeley. Besides laying the foundation for my future research with her many courses in the art, architecture, and language of ancient Egypt, she also impressed upon me the importance of the intrinsic relationship between texts, reliefs, and architecture in Egyptian monuments. This idea motivated me to explore these connections in the Temple of Hathor at Dendera.

After her untimely passing in 2008, only a few months after I had completed my comprehensive PhD exams, Jacco Dieleman of UCLA kindly agreed to guide my dissertation research on the texts at Dendera. His advice, wisdom, and expertise helped me to solidify my approach to the topic; his insightful questions led me to delve deeper into the texts, searching for ways to “untie the knots” of the scribal practices. I cannot thank him enough for his help and support, which was essential in bringing this project to completion.

My heartfelt thanks also go to Carol Redmount, who provided such excellent guidance and support throughout my graduate studies; Niek Veldhuis, who offered helpful advice concerning my data collection, as well as insight into ancient scribal practices; Todd Hickey, who motivated me to explore the meaning behind the composition of the Ptolemaic temple texts. I thank all of them for reading the original dissertation and for providing helpful, insightful comments and suggestions.

For financial support during the research and writing of the dissertation, I would like to thank the Near Eastern Studies Department and the Regents of U.C. Berkeley. I am also grateful to the following organizations, whose financial help gave me the opportunity to present the results of my research to wider audiences: U.C. Berkeley’s Center for Middle Eastern Studies; UCLA’s Department of Near Eastern Languages and Civilizations and the Center for the Study of Religion; the American Research Center in Egypt; the Vancouver chapter of the Society for the Study of Egyptian Antiquities.

The following individuals also deserve a word of thanks for their helpful suggestions directly related to my research: James P. Allen, Kara Cooney, Richard Jasnow, Colleen Manassa Darnell, Kasia Szpakowska, Catharine Roehrig, and David Klotz. Special thanks go to Thomas Schneider for his enthusiasm and encouragement of my work, and his perceptive ideas concerning ways to convey the polyvalent aspects of ancient scribal techniques.

For permission to reproduce images, I am grateful to Richard Fazzini and Mary McKercher of the Brooklyn Museum Mut Expedition, Sionan Guenther and Denise Bastien of the Museum of Art, Rhode Island School of Design, Joanna Kyffin and Carl Graves of the Egypt Exploration Society, Julie Scott of the Rosicrucian Museum, San Jose, CA, Nadine Cherpion, Nevine Kamal, and Cédric Larcher of the *Archives scientifiques* of the IFAO, Cairo, Sayed Hassan and Yasmin El Shazly of the Cairo Museum, Kiersten Neumann of the Oriental Institute of the University of Chicago, and Bert Verrept of Peeters Publishers. Many thanks also go to Erik Gustafson, Vicky Jensen, Duncan Sprott, George Bokhua, Lindsay Ocal, Yvon Maurice, and Lloyd Patton for kindly contributing

photos, and to Rachel Domm, Caris Reid, and David Rager for their excellent illustrations. I am particularly indebted to Thomas Richter, who prepared all of the complex line-drawings and images for publication.

My thanks also go to the staff of the Near Eastern Studies Department at U.C. Berkeley for their excellent support over the years. Shorena Kurtsikidze, in particular, provided invaluable help, making all of the administrative tasks connected with my degree go smoothly.

I would also like to thank Kate Mertes, who prepared the excellent indices; Susanne Wilhelm, of ISD, who created the book's elegant design and layout; Billie Jean Collins, of Lockwood Press, whose patience and expertise transformed my lengthy, complex manuscript into a beautiful book.

The long journey that led to the completion of this book would not have been possible without the love, encouragement, and support of my dear friends and family, especially my husband Roger and our four children. I am particularly grateful for their patience and understanding during what must have seemed like an endless endeavor.

Underline = reversal

Gray Font = special indication for a particular scene: parallelism; alliteration, Late Egyptianisms, words highlighting solar aspect, etc.

Gray Highlight = sign play

**Bold** = word play

**Bold and Gray Highlight** = overlap of word and sign play

[ ] marks a restoration of the original text

< > shows that a word omitted in the original has been supplied

( ) marks English words inserted to clarify the sense

[...] marks lacunae

.... indicates inability to translate

{ } indicates scribal error that should be omitted

\* uncertain

### NOTES ON THE TRANSLITERATIONS AND TRANSLATIONS

In transliterations, proper names of divinities (e.g., *H.t-ḥr*, “Hathor”) and toponyms (e.g., *Iwn.t*, “Iunet”) are capitalized. Compound names are hyphenated in transliteration but not in English, e.g., *Wbn.t-m-nbw*, “She who shines like gold.” Except for a few epithets, like *Nbw.t* (Golden One), *Wbn.t-m-nbw* (She who shines like gold), and *Ir.t-R<sup>c</sup>* (Eye of Ra), most epithets and titles are capitalized only in the English translation; longer epithets capitalize only the first word in English. The epithet, “the Great,” is capitalized, but not separated from the main name by a comma, e.g., “Hathor the Great,” as it is usually considered a unit in English. “Ka” and “Ba” are always capitalized in English, though not in transliteration.

As far as possible, I try to reflect in the English what is happening grammatically in the Egyptian. To this end, prepositional nisbes (adjectives made from prepositions) functioning as substantives are translated to reflect their role, e.g., *ḥnt*, derived from the preposition meaning “at the head of,” is translated as “foremost one”; if feminine, “(f.)” is added, e.g., *ḥnty.t Iwn.t*, “Foremost One (f.) of Iunet” (D III, 50.12).

In order to convey more meaning and allusions, some words are transcribed into English, rather than translated. For example, the male and female sun disks, *Itn* and *Itm.t* are always given as Aten and Atenet; the male and female suns, *R<sup>c</sup>* and *R<sup>c</sup>y.t*, as Ra and Rayt. Occasionally, the words will be rendered so that they replicate in English the word play present in the Egyptian, e.g., *R<sup>c</sup>yt n R<sup>c</sup>.w*, “Female sun of suns.” The four main names of Dendera, *Iwn.t*, *B.t-di*, *T3rr*, *Ḳ3b-b.wy*, and *Nḥry.t*, are given as “Iunet,” “Iatdi,” “Tarer,” “Qab-Tawy,” and

“Netjeryt,” respectively, to maintain their distinctions.<sup>1</sup> “Iunet,” being especially ubiquitous, is discussed in a footnote only in the first text in which it appears (Doc 2). Likewise, the two types of eternity, *d.t* and *nḥḥ*, are translated as “*d.t*-eternity” and “*nḥḥ*-eternity,” rather than the more traditional (and imprecise), “forever,” and “eternally.”

The masculine and feminine titles, *ḥm* and *ḥm.t*, respectively, are translated as “Incarnation,” rather than “Majesty,” in order to convey the idea that the deity is manifest in the physical vehicle of the statue of the god or the body of the living king.

1. Kockelmann (2002, 65, 221–32) notes that the different designations for Dendera (Iunet, Iatdi, and Tarer being the most frequent) function as synonyms, chosen to provide variation between parallel texts and to make word plays in epithets. The frequent occurrence of word plays with toponyms suggests that the scribes used toponym lists in their construction. Thus, the epithet in a text seems to determine the choice of the toponym, e.g., in the repetition in these two epithets: *Nbw.t m-ḥnt pr-Nbw.t*, “The Golden One (f.) in the Sanctuary of the Golden One (f.)” (D III, 72.5); *rnn.n=i 3ḥ.t r-tp pr-3ḥ.t*, “I carry the 3ḥ.t (cow) to the House of the 3ḥ.t (cow)” (D VII, 181.2).
